

VH RESEARCH

Make your patient visits efficient. Simplify your clinical research data capture, tracking, reporting and analysis. Streamline your clinical trials and research studies. All with VH Research.

Clinical research advances the practice of health care through actively promoting research and continuing education for health care professionals. It pursues the highest quality care through the integration of clinical practice, research and education for patients and their families. And clinical research advances medical knowledge by conducting observational and interventional studies through direct interaction and collection and analysis of data.

It is essential to have a solution that lets you focus on the patient and also quickly and easily capture, track, report and analyze a myriad of data. And do that with flexibility to support a variety of research & care needs, trials and studies. VH Research provides that solution – from any location, on any device, at any time. Designed with flexibility at the forefront, VH Research enables you to easily define the information you wish to capture, and how you will view and analyze it. It provides specific functionality for unique clinical research workflows such as quick data capture.

Clinical researchers will optimize their time with their patients through an app that supports their unique workflow. VH Research supports the research efforts while allowing you to provide efficient and high quality care.

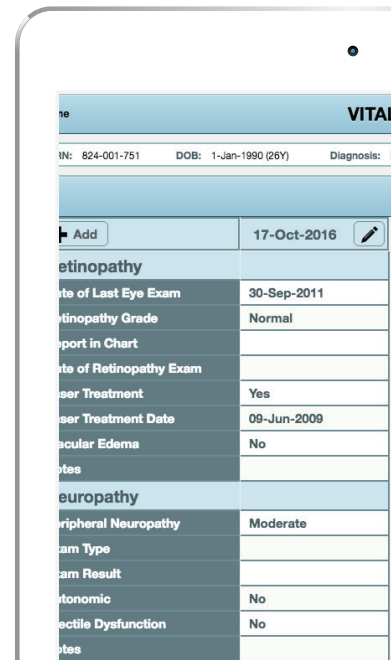

VH RESEARCH SUPPORTS:

- › Integration and co-existence with your hospital's existing HIS
- › Integration to regional and hospital lab systems
- › Configurable workflow design
- › Electronic Case Report Forms (eCRF) and sponsor submissions for clinical trials and research studies
- › Recruitment – patient to participant – informed consent
- › Active task integration
- › Surveys and assessments
- › Cross-site, clinical research collaboration
- › Integrated patient registry
- › Clinic-branded patient app development so your patients can enter data before their visit
- › Aggregated patient data in an easy to use app
- › Flexible electronic data capture
- › Data management and analytics

VitalHub is an innovative application platform, providing a modularized and standardized solution for mobile health (mHealth). With the VitalHub platform you get the control, security, privacy and consistency essential for your healthcare apps. VitalHub includes apps for clinical care, patient experience, communications, medical research.

With VH Research, you can:

- › Replace paper-based flowsheets
- › Automate scorecards for benchmarking across institutions
- › Easily transfer and share patient records between researchers and scientists with appropriate controls to ensure privacy and security
- › Avoid duplicate data entry across multiple systems
- › Quickly identify candidates for your trials and studies
