

VitalHub LTC

AN INNOVATIVE FORMS & TASK MANAGEMENT SOLUTION

VH LTC is an innovative, cloud-based, forms & task management mobile app that helps long-term care staff and facilities be more efficient. For example, PSWs and RPNs use VH LTC to record staff-resident interactions and observations. These interactions would otherwise be recorded on multiple paper-based and electronic systems throughout the facility. VH LTC aims to improve quality of care, ensure data accuracy, save time and cost, and improve staff satisfaction and well-being by putting a mobile device in the hands of frontline staff and providing real time access to important information and tasks.

KEY BENEFITS

VH LTC is a mobile platform that allows frontline staff to use a mobile device as a productivity tool to disseminate and collect data at all points of care.

SAVE TIME AND COST

- Staff no longer need to walk to wall-mounted touch screens, in fact, wall-mounted touch screens could be eliminated.
- Staff no longer need to search through large binders to find and fill out required paper forms.
- Staff can take advantage of unproductive time to catch up on documentation while waiting for residents.
- Trinity Village Care Centre has experienced time savings of 23 minutes per PSW per 8-hour shift, and 1.5 hours per RPN per 8-hour shift.

IMPROVE DATA QUALITY

- Record in real time, instead of waiting until time allows or end of shift.
- Facility-specific standardized forms and criteria reduces data input errors.
- Monitor when staff are recording data to ensure timely entry.
- Trinity Village Care Centre has experienced a 30% improvement in dementia and restraint assignments and observation accuracy.

IMPROVE STAFF SATISFACTION AND WELL-BEING

- With a mobile device, staff has information at their fingertips to improve efficiency and save time. Time can be better spent caring for residents.
- Coordinate staff tasks and track task status for improved compliance.
- Improve team communication and coordinated care by automating alerts and triggering help requests in real-time.
- Trinity Village Care Centre staff have used the time they've saved to spend with residents and take their scheduled breaks improving staff satisfaction and well-being.

BETTER WORKLOAD PLANNING & ANALYTICS

- Identify where bottlenecks and frustrations occur with frontline staff.
- Understand upcoming workload and plan accordingly.
- Identify trends for improved quality of care.
- Unit-specific and enterprise-level observation tracking and trends.
- Resident-specific observation tracking and trends.
- Coordinated care alerts and notifications.
- Trinity Village Care Centre reviews their Tomorrow & Beyond Report every day to ensure appropriate coverage to satisfy workload for the coming 7 days.

FUNCTIONALITY

VH LTC focuses on improving quality while ensuring the technology works for everyone, and long-term care is eagerly embracing it. For example, single-button access to identify residents on Dementia Observation and Restraint Observation provides improved accuracy for recurring observations that take more time to record. VH LTC is designed with form-specific design and observation accuracy at the forefront. With VH LTC, facilities can re-imagine how front-line staff communicate and care for residents.

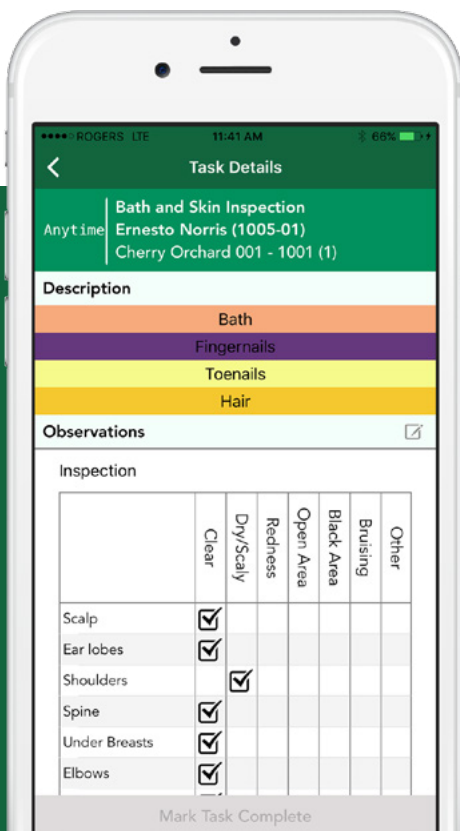

- Simplified recording of recurring form-based tasks such as dementia observations, restraint observations, skin inspections, head injury routine, pain monitoring and many more.
- Staff-targeted task tracking with alerts and colour-coded status visuals.
- Automated scheduling for recurring tasks such as baths, complete with additional information for fingernail, toenail and hair care responsibility.
- Resident-specific appointment tracking
- Automated workflow alerts and help requests.

AVAILABLE REPORTS

- Daily Observation Reports
- Dementia Observation Screening
- Restraint Observation Record
- Bath & Skin Inspection Report
- Rehab/Restorative Care Report
- Head Injury Routine
- Pain Monitoring Report
- Workload Report
- Tomorrow & Beyond Report
- Task Management & Planning Report

“ VH LTC has streamlined the work for all levels of staff, improving their work-life while enhancing the quality of care we provide. We now have accurate, real time information, more reports for analysis, trending data; problem solving is now at our fingertips. ”

Debby Riepert, COO,
Trinity Village Care Centre

Mobile-Enable Your Facility

VitalHub and partners offer an end-to-end solution, taking care of everything from device purchasing/leasing to device support and mobile management. To deploy this solution, VitalHub works with key industry leaders:

- Apple (Canada): Mobile device purchasing or leasing
- CareWorx: 24/7 device support, device management, antibacterial infection control coating
- Other partners to ensure simple and consistent mobilization of productivity tools such as PointClickCare's POC, MaintenanceCare, WorxHub, StaffScheduleCare, myTrainer, and more.

Cloud-Based Deployment

VitalHub deploys this innovative technology through Amazon Web Services (AWS). This means you work directly with VitalHub without having to worry about all the underlying infrastructure, with guaranteed privacy, security and 24/7/365 availability. All you need is WiFi.
